Plastic Manhole Cover

- 24" Internal Diameter
- 31.5" External Diameter
- PPE Plastic / Steel
- B Class
- Water Tight Seal

Installation Instructions

- 1) Prepare area to place manhole cover on top of drainage system or installation of oil/water separator.
- 2) Compact surface around manhole cover where concrete will be poured or unloading plate will be placed. This is to make sure the finish will align with the installed cover.
- 3) Apply silicone sealant around the surface where the manhole cover will be placed.
- 4) Place the manhole cover on prepared area, then bolt the cover to the set concrete or unloading plate.
- 5) Embed installed manhole cover in concrete on all sides. Allow time for concrete to harden. Once concrete is set, you are able to access your manhole over by using an 8mm Allen wrench (5/16") to bolt/unbolt the covers as needed.
